Summary

Motivated Computer Science Engineering student at SRM Institute of Science and Technology (CGPA: 8.53/10) with hands-on experience building applied AI and machine learning projects spanning natural language processing, recommendation systems, and document intelligence. Comfortable across the full model lifecycle, from data preprocessing and feature engineering to training, evaluation, and iteration. Seeking an internship to bring hands-on AI/ML development experience and strong problem-solving fundamentals to an applied AI/ML team.

Education

SRM Institute of Science and Technology <i>B.Tech Computer Science and Engineering</i> — CGPA: 8.53/10	<i>Aug 2024 – Jun 2028</i> <i>Tiruchirappalli, TN</i>
Notre Dame of Holy Cross <i>Senior Secondary (Class XII)</i> — <i>CBSE</i>	<i>Jun 2023 – Apr 2024</i> <i>Salem, TN</i>
Sri Vidya Mandir <i>Secondary (Class X)</i> — <i>CBSE</i>	<i>Jun 2021 – May 2022</i> <i>Salem, TN</i>

Technical Skills

AI / ML: Machine Learning, Artificial Intelligence (AI), Natural Language Processing (NLP), Prompt Engineering, Scikit-learn, Logistic Regression
Languages: Python, C
Frameworks & Libraries: FastAPI, Flet, Pydantic
Databases: MongoDB, MySQL, Firebase/Firestore
Data & Visualization: Pandas, NumPy, Streamlit
Concepts: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems
Cloud & Tools: Git, GitHub

Projects

Documind — Intelligent Document Analyzer — *Python, Scikit-learn, Streamlit*

- | Built an NLP pipeline using TF-IDF vectorization and cosine similarity for in-document semantic search, plus a multi-class logistic regression classifier reaching **86.7% accuracy** across 6 document categories.
- | Engineered PDF/TXT ingestion with PyMuPDF, keyword extraction, and a Streamlit dashboard with model evaluation views, backed by a 13-test automated test suite.

CineMind — AI-Powered Movie Recommendation System — *Python, Scikit-learn, Streamlit*

- | Developed a content-based recommendation engine using TF-IDF vectorization and cosine similarity across **4,800+ films**, with an explainability layer surfacing shared genre, cast, and director signals behind each match.
- | Integrated the TMDB API with a three-tier fallback strategy for live poster and backdrop retrieval.

MozhiAI — Tamil Language Intelligence Platform — *AI-Assisted Development, Emergent*

- | Directed the end-to-end build of a Tamil-language chatbot that understands both native Tamil and Tanglish input and responds natively in Tamil, using an agentic AI app builder (Emergent).
- | Designed a web-scraping feature that transcribes and translates arbitrary web page content into Tamil on demand.

Cloud-Based Task Management API — *Python, FastAPI, Firebase*

- | Developed a RESTful backend service with FastAPI to create and retrieve tasks on a cloud-native architecture.
- | Integrated Google Cloud Firestore via the Firebase Admin SDK for scalable, persistent data storage, with request validation and data modeling enforced through Pydantic.

Competitive Programming

- | Solved **70+ algorithmic problems** on LeetCode using Python, covering arrays, strings, linked lists, stacks, queues, and trees.
- | Applied time and space complexity analysis to optimize solution efficiency.

Certifications

- | Complete C & C++ Programming Course — Mastering C & C++ (Udemy)
- | MongoDB Certification
- | Collaborate Effectively for Professional Success — IBM (Coursera)
